## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on February 26, 2010 has been entered.

### ***Preliminary Remark***

Claims 4-9 and 14 are canceled.

Claim 15 is new.

Claims 1-3, 10-13, and 15 are pending and are under prosecution herein.

### ***Claim Rejections - 35 USC § 112 - Necessitated by Amendment***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation, "consisting essentially of the steps a) to c). This is indefinite because it is unclear which of the steps recited in claim 1 (the parent claim), is deemed essential. If the transitional phrase, "consisting essentially of" is simply treated as an open language (i.e., "comprising") there is no difference in scope between claim 1 and 15.

***Claim Rejections - 35 USC § 103***

The rejection of claims 1-3 and 10-13 under 35 U.S.C. 103(a) as being unpatentable over Becker et al. (Nucleic Acids Research, 1989, vol. 17, no. 22, pages 9437-9446; IDS ref) in view of Amexis et al. (PNAS, October 2001, vol. 98, no. 21, pages 12097-12102) and Ross et al. (BioTechniques, September 2000, vol. 29, pages 620-629)<sup>1</sup>, made in the Office Action mailed on May 11, 2009 is withdrawn in view of the Declaration received on February 26, 2010.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorsington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

The rejection of claims 1-3 and 10-13 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 10/589,709

---

<sup>1</sup> This rejection was already made in the Final Rejection mailed on November 21, 2007, wherein Ross et al. reference was cited as an evidentiary reference for Official Notice taken. The Final Rejection under this practice was justified as set forth in MPEP 2144.03(D). The Ross reference is now being cited as a part of the references being relied upon in the present rejection.

(herein, the '709 application), made in the Office Action mailed on May 11, 2009 is maintained for the reasons already of record.

In addition, claim 15 is rejected herein as being necessitated by Amendment (by way of its addition)

Applicants are advised that the '709 application has passed to issue as a U.S. Patent, but the actual patent number has not yet been assigned.

Applicants', in their response received on February 26, 2010, state that the rejection be held in abeyance until the claims are otherwise in condition for allowance (page 9, Reponse).

As no terminal disclaimer has been found, and since the instant application is a later-filed application, the rejection is maintained herein.

During the telephonic conversation which took place on April 8, 2010, Mr. Eisenstein was advised that the present Office Action with the instant ODP rejection will be mailed.

### ***Conclusion***

No claims are allowed.
